

Microphone

MEG40-14

MEG14-40 is a high quality gooseneck microphone. It utilizes a condensor microphone with a cardioid pattern. Its 40 centimeter stand makes it easy for the speaker to adjust its height and direction. Proper shielding of the microphones prevents interference from noise signals.

- Excellent frequency response
- Enhanced design
- Low noise level
- Cardioid pattern suitable for meeting venues

Capsule	Condenser
Pattern	Cardioid
Frequency response	50 - 20000 Hz.
Noise level	26 dBA
Impedance	< 100Ω
Connector	XLR 3M for microphones with no light XLR 5M for microphones with light
Length	400 mm
Phantom power	48 V
Operational current	3 mA
