

Model : P90

P90 is a two-stage pedestal which is designed to support camera/lens combination up to 90 Kg, covering the entire range of studio and OB configurations. The system is compact and portable, and the 2-stage column performs an on-shot stroke of 77 cm. with a smooth and precise movement. The sturdy and yet lightweight dolly is equipped with high precision double wheels interlocked by a special designed chain allowing accurate traveling and steering.

Features:

- Crab Position for wheels allows passage of P90 from narrow doorways
- All operating devices and control displays at easy access of cameraman
- Pneumatic column works on simple compressed air
- Innovative design of the Piston avoids complicated balance setting with no need for any counter weights.
- Suitable for all flat base heads, 4-bore holes heads or other bowl based heads
