

Model : TFL-650

TFL-650 is a durable studio spot lighting fixture with a sturdy Aluminum extrude housing which is manufactured from high quality material. The combination of the Fresnel lens which is manufactured in Germany together with the Aluminum anodized barn doors provide a superb and uniform lighting output. The projection angle of the light and its homogeneity can be controlled with the help of two gearbox controlled levers. Technical features and standard quality of TFL-650 make it a perfect product for studio and professional applications.

Accessories:

- Lamp
- Safety belt
- leaf barn door
- Filter holder
