

TPL-1000

TPL-1000

aLDR Parcan can be distinguished from others for its high quality finishing and ruggedness, thus providing extended usage period. Its aluminum body is made from considerable thick aluminum sheet, preventing unnecessary dents during handling. The tilt adjustment clamps offers superior clamping at any positions where others would bow away when heat sets in. Various models are available, short of long, polished or black.

Various models are available, short of long, polished or black.

aLDR's Coolbeam Parcan is an alternative to the conventional Par light fittings, which offers brighter light output with lower beam temperature, as the name implied. With its aluminum casting, it has better heat dissipation property and the unique light reflector projects cooler and brighter light as compared to normal Parcan. A 575W bulb projected from this Coolbeam Parcan shall be equivalent to 1000W normal Par 64 light fitting.

Specification

Wattage	1000 W	1250 W
Luminaire efficiency	34.6 %	35 %
Luminance of 5 meter	753 lux	941 lux
Uniformity of illuminance	8548 lm	10960 lm
Body weight	2.7 Kg	2.7 kG
