

TTCL-1000

TTCL-1000 Fresnel Spotlight

spotlights provide a choice of two Fresnel and pc to meet the requirements, in simple optical systems, the high performance lenses collect more light and deliver better beam control. This series spotlights are designed for easy maintenance and use.

Opening system:

The base is locked by a spring-puller, just pull the puller and the base flaps down.

- Replacing lamp convenient and fast in all conditions.
- Cleaning the reflector and lens easy.

Screw bolt focus system

Adjust the focus knob freely to obtain the ideal beam angel you want. The operation is easy and convenient because of the new design of focus system.

Aluminium alloy material

Extraction and clre castry compact and durable. Special releasing channel, excellent heat dissipation.

Heat resistant plastic handle

Heat resistant plastic handle for adjusting the angle easily, and protecting your hands from being burned by the lamp.

Specification

Voltage	AC 220V
Suitable lamp	CP71/CP93 (1000/1200W)
Body weight	7.1 Kg
Lens	FRESENEL $\phi 200\text{mm}$
Lamp socket	G22
Body material	Aluminium
