

TTSL-400

PD500N The film and television floodlight

mirror as cellulite reflector, asymmetric optical curve, high reflectivity, high illumination, spot illumination distribution, compact high-pressure cast aluminum structure, with double air channel heat sink, increasing the heat convection exchange, to achieve reliable cooling effect, eight hours of continuous use lampholder keeping the temperature below 200 \, configure high temperature, shock of explosion-proof glass, safe and reliable.

 $\ensuremath{ ext{ iny Widely}}$ used in television studio, filming and stage backdrop, to screen, soft King, King and other hard light cloth, cloth color use, but also for meeting the lighting system.

Specification	
Rated Voltage	AC220V
Frequency	50Hz
Rated Power	500W
Color Temperature	3200K
Match Bulb Specifications	500W R7S
Measurement(L×W×H)	310×160×160(mm)
Net Weight	2.8kg
