

DSP-104

DMX Splitters are particularly in demand for DMX512 applications covering long distances, where unwanted interferences and frequencies are to be avoided. The DMX Splitter functions as a signal distributor and booster. 4 DMX outputs, each equipped with 3 pin or 5 pin XLR connectors for compatibility in any DMX setup and 100% electrical isolation between all in/outputs. Signal and power LED indicators on front panels for each output is useful to detect error.

Features:

- Fully compliant to DMX-512 (1990)
- 3pin & 5pin DMX Input and DMX Thru
- 100% electrical isolation between in/output
- 100% electronic isolation between output/output
- Signal & power LED indicator for each output
- Removable rack wings for Rack mount or wall mount

Specification

Power input	AC230V 50Hz
Consumption	5W
Size	482 x 130 x 44mm (19" Rack, 1U)
Weight	1.6kgs
