

Headphone HDB-25

Due to their low weight, the HDB- 25 headphones are indispensable for mobile monitoring. The closed-back HDB- 25 are purpose-designed, professional monitoring headphones offering high attenuation of background noise.

Capable of handling very high sound pressure levels and of extremely robust construction, these headphones perform exceptionally well in loud environments, e.g. ENG, sound reinforcement, studio monitoring and audio equipment testing. Ideal monitoring headphones for cameramen and DJs, these are a pair of true sound professionals' working headphones.

- High sensitivity due to lightweight aluminium voice coils
- Capable of handling very high sound pressure levels
- Very lightweight and comfortable, even if used for long periods of time
- Tough, detachable, single-sided cable
- Rotatable capsule for single-ear listening

Color	red&black
Frequency response	10 - 22000 Hz
Sensitivity	101 db SPL
THD, total harmonic distortion	< 0,3 %
Contact pressure	~ 2,5 N
Jack plug	3,5/6,3 mm stereo
Cable length	1.2 m
Transducer principle	dynamic, closed
Weight	~ 165 g
Nominal impedance	70 Ω
Load rating	200 mW
Max. Sound pressure level	120 dB
